## Purpose

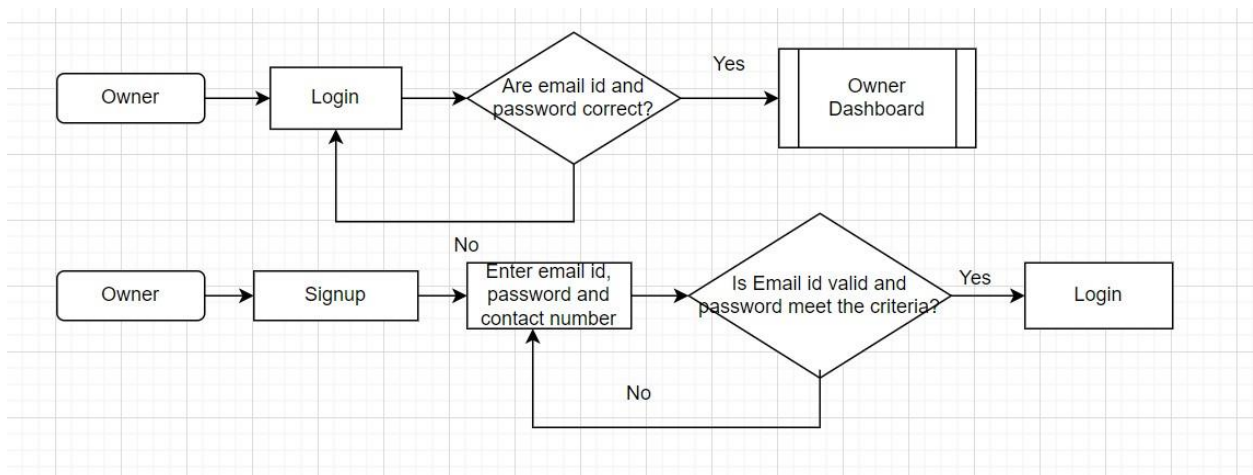

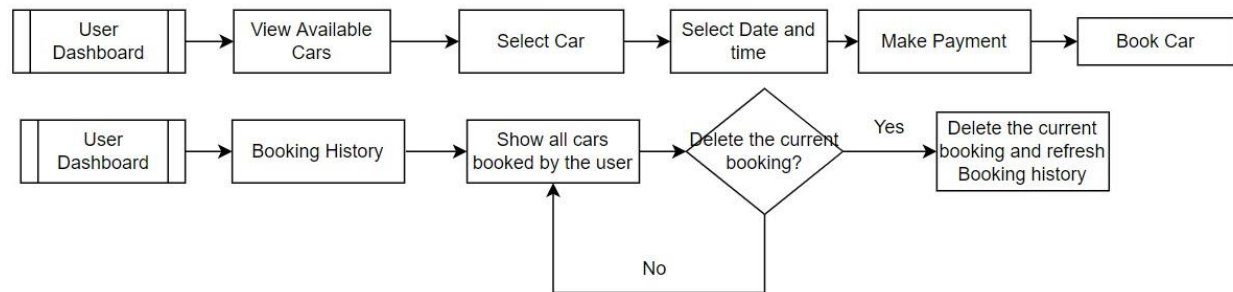

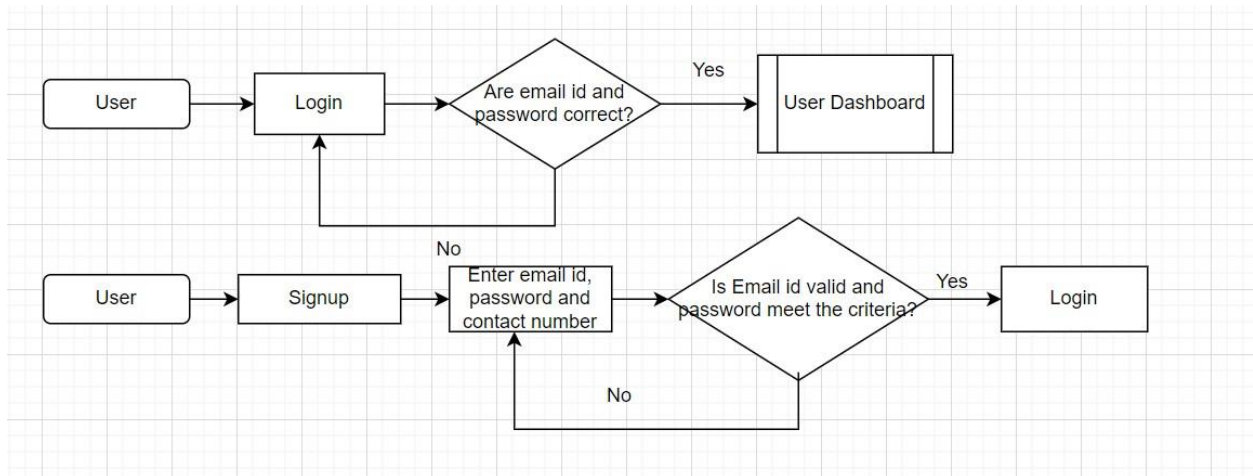

This document specifies the software requirements of a Car Rental Application. The purpose of the application is to be able to rent cars to clients. There are three types of people who will be using this App.

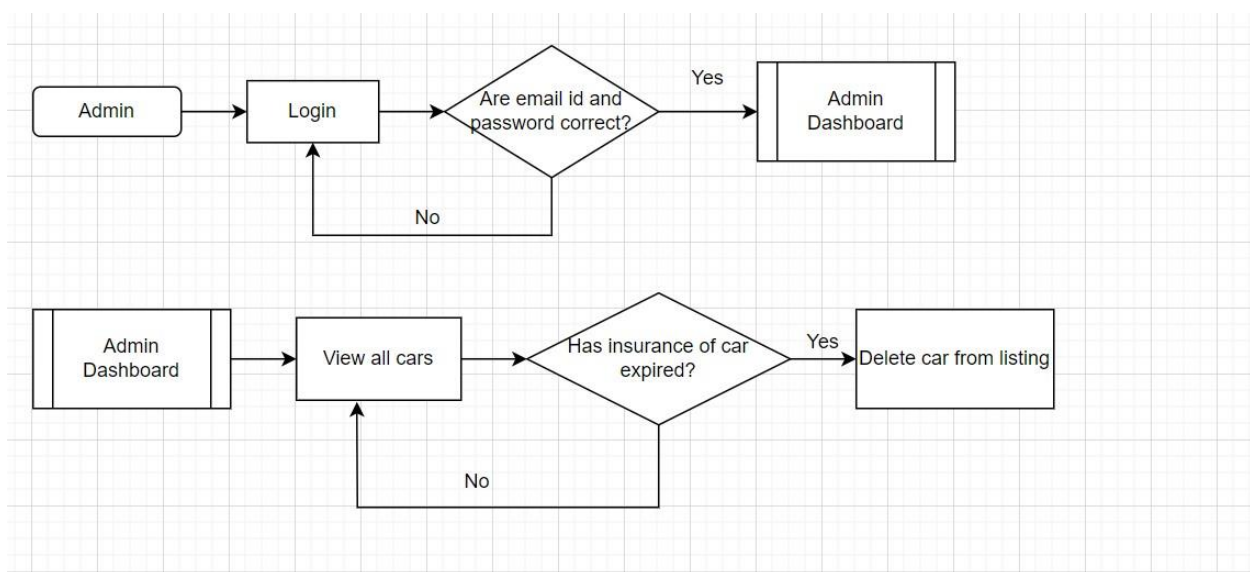

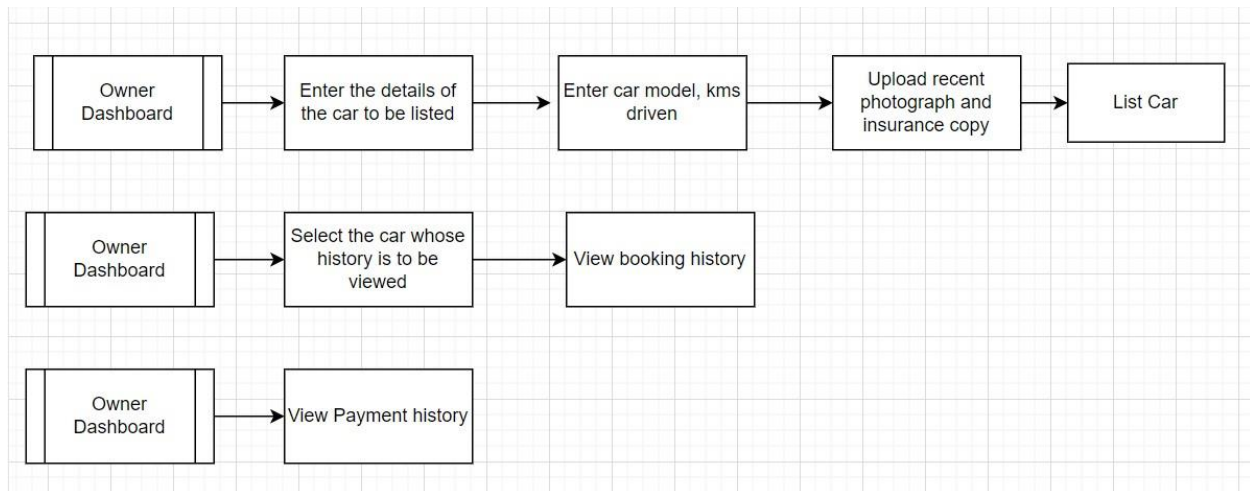

- User: Who can register, login to the App and rent a car
- Owner: Who can register, login to the App and list his/her car to be rented
- Admin: Who can login to the App, view all users/owners/cars and manage the App
